The National Department of Health has recommended that **South Africans should wear CLOTH face masks** when in public to prevent the spread of COVID-19.

The National Department of Health recommends that:

Everyone should wear **CLOTH** face masks when in public.

Members of the public should not use N-95 and surgical masks; medical masks remain reserved only for healthcare workers.

Handwashing and social distancing still remain the most important prevention strategies for COVID-19

“We recommend the widespread use of cloth masks. Individuals can make their own masks, there shouldn’t be a need for everyone to be wearing surgical/ n95 masks.”

South African Health Minister, Zweli Mkhize
